

Solar Spot Light INSTRUCTION MANUAL

READ THE INSTRUCTIONS CAREFULLY BEFORE ASSEMBLY AND INSTALLATION.

CHARGING AND OPERATION:

1. Charge the solar product by placing it under direct sunshine for at least 8 hours before using it for the first time.
2. Press the ON/OFF button once, the light will be turned on at "LOW" level (dimmer), press the button again, the light will be at "HIGH" level (brighter), press the button the third time, the light will be turned off.
3. Illumination time after full charge: about 3-4 hours at "HIGH" level, 6-8 hours at "LOW" level.

IMPORTANT:

1. Install the solar product in an area where it can get direct sunlight.
2. For longer illumination time, please press the ON/OFF switch till the light stays at "LOW" level
3. Select an outdoor location away from other light source at night, such as street lights. Other lights may cause the product to not turn on automatically at night.
4. Duration of light depends on solar product's level of sunshine exposure, geographical locations, weather conditions and the hours of daylight.

MAINTENANCE, TROUBLE SHOOTING AND BATTERY REPLACEMENT

1. Keep the solar panel clean.
2. If solar product does not light up after it has been used for around 1.5 years, replace the rechargeable batteries as they may be weak or worn out. (Battery 1 pc 18650# 3.7v 2200Mah, lithium battery or the same equivalent type as recommended must be used).
3. Exercise caution when replacing batteries. Open the battery cover to replace the old battery with a new one. Battery must be recycled or disposed of properly, don't dispose batteries in fire or trash. Contact your town or city's recycling center to find out how to properly dispose batteries.
